Forecast for Tuesday 02 Jul 2024

Weather: On the cloudy side throughout, with the best of limited sunny intervals probably around mid-morning before higher cloud advances and thickens. This cloud will eventually result in evening rain, although much of the rest of the day should stay dry.

Chance of cloud-free hill tops above 600m: 70%

Low cloud and visibility: A chance of isolated amounts of fair weather cloud shrouding some of the hill tops during the morning, but most cloud bases will remain above the summits for the rest of the day. Visibilities will generally be good or very good.

Valley	11/10	14/12	15/13	16/15	15/14	12/12	12/11
Freezing Level*	2200m	2200m	2100m	1900m	1900m	1900m	1900m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Moderate to high UV levels during Tuesday so some form of sun protection is advised if spending any length of time walking or hiking on the hills.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Tue 02 Jul 2024	0mm	0.4mm	1mm

Forecast for Wednesday 03 Jul 2024

Weather: Cloud and rain moving in from the west throughout the morning. Rain turning patchier during the afternoon though remaining cloudy until later in the evening. A brisk to strong west to southwesterly wind developing throughout the day, possibly reaching near gale across the summits.

Maximum wind: West to southwesterly 25-30 mph, gusting 35-40 mph.

Chance of cloud-free hill tops 600m: 30% through much of the day, 60% during the early hours and late-evening.

Low cloud and visibility: Outbreaks of persistent rain often bringing areas of low cloud across the park, particularly across higher summits, with hill fog likely for much of the day. Visibility poor in outbreaks of rain.

Temperature: **Valleys:** Plus 11 Celsius, rising to plus 17 Celsius.
At 600m: Plus 7 Celsius, rising to plus 10 Celsius.
Freezing level: Above the summits.
